Take care of your own safety. If any health problems arise or if in doubt, inform a doctor and show them the information in this safety data sheet. If unconscious, put the affected person in the stabilised (recovery) position on their side with their head slightly bent backwards and make sure that airways are free; never induce vomiting. If the person vomits by themselves, make sure that the vomit is not inhaled. In life threatening conditions, first of all, provide resuscitation to the affected person and get medical assistance. Respiratory arrest – provide artificial respiration immediately. Cardiac arrest – provide indirect cardiac massage immediately.

If inhaled	Eliminate exposure immediately; move the affected person to fresh air. Protect the person against growing cold. Provide medical treatment if irritation, dyspnea, or other symptoms persist.
If on skin	Remove contaminated clothes. Wash the affected area with plenty of water, lukewarm if possible. Soap, a soap solution, or shampoo should be used if there is no skin injury. Provide medical treatment if skin irritation persists.
If in eyes	Rinse eyes immediately with a flow of running water: open the eyelids (also using force if required); remove contact lenses immediately if worn by the affected person. Rinsing should last for at least 10 minutes.
If swallowed	Rinse out the mouth with water and provide 2–5 dL of water. Provide medical treatment.

### 4.2. Most important symptoms and effects, both acute and delayed

If inhaled	Not available.
If on skin	Not expected.
If in eyes	Not expected.
